

CALL FOR PAPERS

// CONFERENCE

5th International ZEW Conference on the Dynamics of Entrepreneurship (CoDE)

12 – 13 October 2023 | Mannheim

Business dynamism describes the process of new businesses entering a market, growing, contracting, and eventually exiting. This Schumpeterian process of creative destruction, which characterises modern market economies, drives fundamentals such as employment and productivity growth dynamics. Innovation, and entrepreneurial activity in particular, are not only key to understanding these dynamics, but also essential for addressing societal challenges such as environmental sustainability, demographic change, employment and competitiveness.

The aim of this conference is to discuss recent scientific contributions on entrepreneurial activity, its interdependencies with innovation, environmental sustainability, and financial burdens, as well as its challenges for public policies and its implications on employment, income and economic growth.

The conference also addresses the challenges and opportunities of entrepreneurship policies to promote radical and disruptive innovation. For that purpose, selected economists and political representatives will jointly participate in a panel discussion on the contribution of young firms to the transformation of our economies.

You are welcome to participate in the conference, where theoretical, empirical and/or policy-oriented contributions on all research areas of entrepreneurship are appreciated. The non-exhaustive list of topics includes:

Business dynamism, aggregate productivity growth, job creation and destruction // Population and business demography // Impact of the Covid-19 pandemic on entrepreneurial activity // Direct and indirect contributions of entrepreneurial firms to innovation // Transformation through entrepreneurship (e.g. “green” start-ups, environmental innovation, social innovation) // Entrepreneurship and digitalisation // Founder personality and motivations of entrepreneurs and entrepreneurial teams // Incubators, corporate and academic spin-offs // High growth: scale-ups, gazelles and unicorns // Financing young firms: venture capital, business angels, crowdfunding and banks // Human capital, employment, wages, and workplace quality in entrepreneurial firms // Impact and efficiency of public entrepreneurship policies

INVITED SPEAKERS

Ufuk Akcigit, University of Chicago, US · **Flora Bellone**, Université Côte d’Azur, Nice, FR · **Annamaria Conti**, IE Business School, Madrid, ES · **Ben Pugsley**, University of Notre Dame, US
